Dipesh Sukhia

Senior Software Engineer

+91 9904311436 | dipesh.sukhia@gmail.com | linkedin.com/in/dipeshsukhia | github.com/dipeshsukhia

Summary

Senior Software Engineer with 9+ years building and scaling Laravel/PHP, React, and AWS-based systems for real estate, fintech, and e-commerce platforms. Led a PHP 8.3 migration spanning **179+ internal packages** with zero critical-path downtime, cutting deployment time by **20%**, and served as technical point of contact coordinating package-upgrade compatibility across engineering teams. Delivers measurable outcomes – **20–40% gains** in load time, transaction speed, and data-sync performance – across multi-tenant, high-availability production systems.

Skills

Languages: PHP, TypeScript, JavaScript (ES6), SQL

Backend: Laravel, Lumen, CodeIgniter, Node.js, Nest.js, MVC Architecture, REST API Design, Microservices, Composer

AI/ML: LangChain, LangGraph

Frontend: React.js, Tailwind CSS, jQuery, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Infrastructure: AWS (Lambda, ECR, SQS, EventBridge), Docker, Terraform, GitHub Workflows (CI/CD), GitHub Packages, Git

Practices: Technical Leadership, Cross-Team Alignment, System Architecture, Code Review, Agile, Analytics & Feature-Flag Systems (Amplitude)

Experience

Sr. Software Engineer Level 4 *Jul 2022 – Present*
Entrata India Pvt. Ltd India

- Designed and deployed the Property AI Inspection solution on AWS (ECR, Lambda, SQS, EventBridge), building a scalable event-driven pipeline for automated inspection workflows.
- Architected and led a full PHP 8.3 migration across the entire Entrata product suite, upgrading **179+ internal packages** and reconfiguring external dependencies via Docker, cutting deployment time by **20%**.
- Served as the central technical lead coordinating migration alignment across **80+ engineering teams**, resolving package-compatibility conflicts and improving overall project delivery efficiency by **25%**.
- Configured Amplitude analytics and feature-flag infrastructure to optimize user activity monitoring and enable safer, incremental feature rollouts on Entrata.com.
- Executed Twilio configuration and A2P 10DLC registration for Entrata.com's messaging compliance.

Sr. Software Engineer Level 2 *Jul 2021 – Jul 2022*
IndiaNIC Infotech Limited India

- Implemented modular components and REST APIs for Claimit / Obvio Health, a clinical trials management portal covering digital recruitment, participant registries, and hybrid/siteless trials, improving data-sync speed by **25%** in collaboration with a remote team.

Technical Lead → Sr. Web Developer → Web Developer *Jan 2017 – Jul 2021*
Techplus Software Pvt. Ltd India

- Progressed from Web Developer to Technical Lead over 4+ years, taking ownership of client architecture decisions and mentoring team members on Laravel/PHP best practices.
- Built the admin dashboard and REST APIs (iOS, Android, web) for Cashremit.com.au, a money-transfer platform, reducing transaction processing time by **40%**.
- Directed development of Swayamwar4u.com, a matrimony platform, driving a **20%** increase in user registrations.
- Developed a multi-tenant store system and REST APIs for iOS, Android, and desktop for Latestbeta.com, achieving **30%** faster load times.
- Designed loan-processing components for the Novanic Up portfolio (Easy Car Loan, Fund My Car, Refinanceacar, Vavroom, and related brands), improving loan application processing time by **15%**.
- Delivered a mix of long-term builds and short-term client engagements, improving average delivery turnaround by **10%**.

Projects

Entrata.com *(PHP, Docker, GitHub Workflows, Terraform, AWS)* – Core platform for property management software; led the PHP 8.3 migration and AI-driven inspection tooling (see Experience).
Cashremit.com.au *(Laravel, Bootstrap, jQuery)* – Admin dashboard and REST APIs (iOS, Android, web) for a cross-border money-transfer application.
Swayamwar4u.com *(Laravel, Bootstrap, jQuery)* – Matrimony platform; led end-to-end feature development and registration flow.
Latestbeta.com *(Laravel, Bootstrap, jQuery)* – Multi-tenant e-commerce store system with REST APIs for iOS, Android, and desktop clients.
Claimit / **Obvio Health** *(Laravel, Bootstrap, jQuery)* – Clinical trials portal covering digital recruitment, participant registries, and hybrid/siteless trials (see Experience, IndiaNIC Infotech Limited).
Novanic Up Portfolio *(Laravel, Bootstrap, jQuery)* – Car-loan and refinancing product suite (Easy Car Loan, Fund My Car, Refinanceacar, Vavroom, and related brands).

Achievements & Honors

Winner, AWS GameDay 2026 – Amazon Web Services (AWS), hosted at Entrata – Jul 2026
New Hire Training Facilitator – Led onboarding/training sessions for incoming engineers – Entrata – Aug 2026
Person of the Week, December 2024 – Entrata – Dec 2024
Star of the Month – Techplus Software Pvt. Ltd – Aug 2018
Organizer, Cyberpunk Techno Mantra 2016 – K.S. School of Business Management – Jan 2016
